SAURAV KUMAR JAISWAL

Cybersecurity Engineer | Penetration Tester | VAPT Specialist | Security Automation Engineer

eJPTv2 Certified · PT1 Certified · ICCA Certified

+91-9939112334 | saurav.jaiswal.meee@gmail.com | linkedin.com/in/meesauravjaiswal | github.com/meesauravjaiswal | tryhackme.com/p/saurav.jaiswal | Bhagalpur, Bihar, IN

Cybersecurity Engineer and Penetration Tester with hands-on experience in Vulnerability Assessment and Penetration Testing (VAPT), security automation, and threat analysis. Proficient in Python, Kali Linux, Burp Suite, Metasploit, Nmap, SQLMap, OWASP ZAP, Splunk, and Wireshark. Experienced in designing automated security assessment frameworks with CVE mapping and risk-based report generation. Strong foundation in network security, active directory security, MITRE ATT&CK framework, and TCP/IP protocols. Certified eJPTv2, PT1 (TryHackMe), and ICCA (INE). Seeking to contribute to a high-impact cybersecurity team as a Penetration Tester, Security Engineer, or SOC Analyst.

CORE COMPETENCIES

- Vulnerability Assessment & Penetration Testing
- Network Security & Traffic Analysis
- Security Automation & Scripting
- Web Application Security Testing
- Active Directory Security & Hardening
- MITRE ATT&CK Framework Mapping
- Threat Detection & Incident Response
- CVE Analysis & Risk Prioritization
- Subdomain Enumeration & Reconnaissance

PROFESSIONAL EXPERIENCE

Cybersecurity Intern | Gurugram Police — GPCSSI'25

Jun 2025 – Jul 2025 | Gurugram, Haryana

- Developed **AutoVAPT**, a fully automated VAPT framework integrating Nmap, SQLMap, and OWASP ZAP to perform comprehensive web, network, and database vulnerability assessments.
- Implemented automated **CVE mapping with CVSS scoring** to prioritize vulnerabilities by risk severity and accelerate remediation decision-making.
- Built a structured PDF and JSON report generation module delivering actionable security findings in a professional, auditable format.
- Conducted network scanning, port enumeration, service fingerprinting, and SQL injection testing across multiple target environments.

Broadcasting Lead of CyberVault | CyberVault Club, KIIT University

2024 – 2025 | Bhubaneswar, Odisha

- Led the university cybersecurity club and conducted structured **workshops on VAPT, ethical hacking, and network security** for 50+ students.
- Organized **CyberXposed**, a high-profile cybersecurity event featuring sessions by an ACP-rank police officer and a certified cyber expert, significantly growing club membership.
- Mentored junior members on penetration testing tools including Burp Suite, Metasploit, and Nmap through practical lab sessions.

PROJECTS

AutoVAPT — Automated VAPT Framework | Python, Nmap, SQLMap, OWASP ZAP, CVE Mapping

- Engineered an end-to-end security assessment pipeline automating reconnaissance, vulnerability scanning, SQL injection testing, and web application analysis in a single execution.
- Integrated CVE database mapping to classify vulnerabilities by CVSS score, enabling risk-prioritized remediation recommendations.
- Designed a modular plugin-based architecture allowing seamless addition of security tools without modifying the core framework.
- Generated structured PDF and JSON reports summarizing findings, affected hosts, severity ratings, and remediation steps.

SubEnum — Subdomain Enumeration Tool | Python, DNS, HTTP Probing, Concurrency

- Built a high-performance subdomain enumeration utility using concurrent DNS resolution and HTTP probing to rapidly map attack surfaces of target domains.
- Implemented custom wordlist support and configurable concurrency limits to optimize enumeration speed and accuracy.

- Structured output in machine-readable formats for seamless integration with Nmap and Burp Suite pipelines.

CERTIFICATIONS

- **eJPTv2 — Junior Penetration Tester** | INE eLearnSecurity · Jun 2025 · Skills: Assessment Methodologies, Web App Pentesting, Network Security, Host & Network Enumeration
- **PT1 — Penetration Tester Level 1** | TryHackMe · Aug 2025 · Skills: Penetration Testing, VAPT, Web Application Security, Privilege Escalation, Active Directory
- **ICCA — INE Certified Cloud Associate** | INE · Jun 2025 · Skills: AWS IAM, IaaS, Cloud Security Fundamentals

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science and Communication Engineering

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar | CGPA: 8.56 / 10.0 | Sep 2022 – Jul 2026

Class XII (CBSE) — 88% | The Millennium School, Lucknow | 2020

Class X (CBSE) — 92.33% | The Millennium School, Lucknow | 2018

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, Bash

Security Tools: Nmap, Burp Suite, Metasploit, OWASP ZAP, SQLMap, Wireshark, Splunk, Autopsy

Security Concepts: VAPT, Penetration Testing, Active Directory Security, MITRE ATT&CK, Network Security, Web Application Security, Firewall Configuration, Threat Analysis

Networking: TCP/IP, DNS, DHCP, OSI Model, Subnetting, Network Enumeration

Operating Systems: Kali Linux, Windows Server, Ubuntu

Data & Analytics: MySQL, Oracle SQL, Advanced SQL, Power BI, Excel

Tools & Platforms: Git, GitHub, VS Code, Cursor, Claude AI

ACHIEVEMENTS & LEADERSHIP

- **2nd Position — Microsoft Stark Expo 2023 (KIIT Chapter):** Secured runner-up position among top engineering students in a competitive hackathon and innovation showcase organized by Microsoft.
- **Organized CyberXposed:** Led a flagship university cybersecurity event featuring an ACP-rank police officer and a certified cyber expert, driving cross-department awareness of real-world cybersecurity threats.
- **Broadcasting Lead of CyberVault Club, KIIT:** Organized VAPT workshops, ethical hacking sessions, and mentored 50+ students in practical security skills and industry tools.
